**Notes:**

1. Abbreviations for **full-time** and **part-time** have been used in these supplementary tables. The abbreviations used are FT and PT, respectively. For full definitions of these terms, see Appendix 1.
2. All tables **include** the self-employed.
3. Households reporting the lowest incomes may not have the lowest living standards. The bottom 10 per cent of the income distribution should not, therefore, be interpreted as having the bottom 10 per cent of living standards. This is a particular issue for lower thresholds of mean and median. To reflect this uncertainty, in the H tables, results for the thresholds 40 per cent of mean and 50 per cent of median are presented in italics.
